

Target Pollutants
Dissolved metals
Roof litter

Removes other metals, too!

Zinc-B-Gone, a cost-effective, standalone stormwater treatment technology, provides an advanced level of stormwater pollutant removal. Designed specifically for filtration of rooftop runoff containing total and dissolved metals, these units reduce zinc and other dissolved metals to benchmarks or action levels. Zinc-B-Gone is available in various sizes, from a unit sized for an individual downspout (basic) to larger sizes for combined downspouts (pro). All sizes are highly effective and economical to operate and maintain, and are built with a super-duty tank for many years of reliable and consistent service.

Zinc-B-Gone® basic

for individual downspout applications

- Rated at 15 gpm
- Fits 3" - 4" round or square downspout
- Ideal for TSS <10 mg/L
- Contains 10 lb. dissolved zinc or other metals removal capacity, for years of service
- Reversible: right inlet/outlet or left inlet/outlet
- Integrated, cleanable debris screen
- Lockable lid
- Drain port for winterization
- Do-it-yourself installation and maintenance with forklift pockets
- Compact design: L 46 in., W 26 in., H 42 in.; 950 lbs.

Zinc-B-Gone® pro

for large-scale roof-runoff applications:

- Rated from 25 gpm to 1200 gpm, dependent on model
- Separate pretreatment and filtration chambers for reduced maintenance
- Internal high flow bypass, totalizing flow meter, flow control valve, inlet & outlet sample ports
- Includes factory assistance for installation
- Cover, freeze protection and other options available

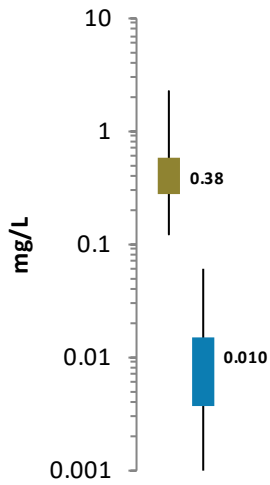

StormwaterRx LLC designs, manufactures, installs and maintains stormwater treatment systems for industrial customers throughout North America. Contact StormwaterRx to find out how we can help you meet your stormwater quality requirements.

Performance

Total Zinc

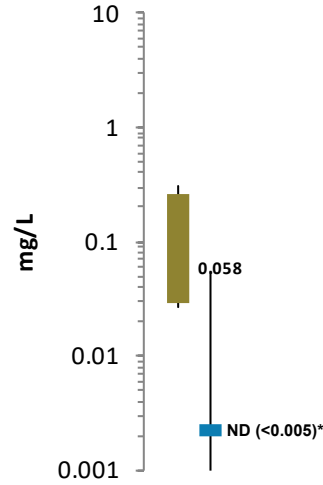

Median Removal Efficiency: 98%

Total Copper

Median Removal Efficiency: 96%

Total Lead

Median Removal Efficiency: 94%

How to read the plots:

- Before treatment
- After treatment

Reported values are median of respective sample sets.

Box Range = 25th - 75th percentile

Whisker Range = 5th - 95th percentile

*nondetect value, reported at ½ the detection limit.
